

CHUFR Token White Paper

Empowering the Luxury Ride-Hailing Ecosystem

1. Executive Summary

CHUFR Token is the native cryptocurrency of the **Chaufr ecosystem**, a luxury ride-hailing platform designed to offer unparalleled convenience, exclusivity, and transparency. CHUFR Token serves as the primary medium of exchange within the Chaufr platform, enabling ride payments, tipping, staking, and more. By integrating blockchain technology, Chaufr ensures a decentralized, secure, and scalable financial layer to support its growing user base.

2. Token Details

Attribute	Details
Token Name	ChaufrCoin (CHUFR)
Symbol	CHUFR
Blockchain	Binance Smart Chain (BSC)
Token Standard	BEP-20
Total Supply	1,000,000,000 CHUFR
Decimals	18

3. Key Features of CHUFR

1. Treasury Wallet Mechanism

- **1% Fee on DEX Transactions:** Automatically routes to a treasury wallet to fund liquidity, marketing, and project growth.
 - Configurable by the owner, with a maximum fee cap of 5%.
- 2. Burn Mechanism**
- Default burn rate of 1% per transaction (adjustable).
 - Burn functionality can be toggled on/off by the owner.
- 3. Utility-Driven**
- **Ride Payments:** CHUFR is the exclusive payment method for Chaufr rides and tipping.
 - **Staking and Rewards:** Token holders can earn staking rewards.
- 4. Deflationary Model**
- Burn mechanism ensures a gradually reducing supply, increasing scarcity and value over time.
- 5. Compatibility**
- Fully ERC-20/BEP-20 compliant, ensuring seamless integration with DEXs, wallets, and other platforms.

4. Tokenomics

Category	Allocation	Tokens	Details
Presale	30%	300,000,000	Public presale with phased pricing and vesting.
App Utility	30%	300,000,000	Tokens reserved for in-app payments, tipping, and rewards.
Marketing/Community	10%	100,000,000	Incentives for user acquisition, partnerships, and campaigns.
Liquidity Pool	10%	100,000,000	Initial and future liquidity on DEXs.
Team/Development	10%	100,000,000	Vested over 4 years to ensure long-term commitment and growth.
Staking Rewards	10%	100,000,000	Rewards for token holders participating in staking pools.

5. Presale Details

Phased Presale

1. Phase 1

- **Price:** \$0.01/CHUFR
- **Start Date:** Upon deployment
- **End Date:** September 1, 2025

2. Phase 2

- **Price:** \$0.03125/CHUFR
- **Start Date:** September 1, 2025
- **End Date:** January 1, 2026

Immediate Token Release

- **15% of tokens** purchased during the presale will be unlocked at the end of the presale (January 1, 2026).

Vesting Schedule

- **Remaining 85%** of presale tokens will vest over **24 months**, beginning January 1, 2026.

6. Treasury Wallet Workflow

1. Purpose:

- Collect 1% of all DEX transactions to fund liquidity pool growth, marketing, and operational needs.

2. Process:

- 1% of each transaction is routed to the treasury wallet.
- The owner can use the funds to:
 - Add liquidity to the DEX.
 - Fund marketing or other project initiatives.

3. Owner Controls:

- Ability to adjust the fee percentage (up to 5%).

- Update the treasury wallet address if needed.
-

7. Vesting Contracts

Public Presale Vesting

- **15% Immediate Release:**
 - Tokens are partially unlocked at the end of the presale.
- **Monthly Vesting Schedule:**
 - Remaining tokens vested linearly over 24 months.

Team Vesting

- **Duration:**
 - Tokens are locked for 4 years, beginning after presale end.
 - **Monthly Releases:**
 - Gradual unlocking to ensure alignment with project success.
-

8. User Workflow

1. Presale Participation:

- Users connect their wallet to the presale webpage.
- Purchase CHUFR using BNB or USDT at the current presale price.
- Tokens are sent to the vesting contract, with 15% reflected in their wallet upon presale completion.

2. Post-Presale Usage:

- 15% of purchased tokens can be traded immediately on DEXs (e.g., Uniswap).
- Remaining tokens unlock monthly through the vesting contract.

3. Treasury Integration:

- 1% of every transaction on DEXs is routed to the treasury wallet for liquidity and project growth.
-

9. Roadmap

Phase 1 (Q2 2025):

- Token deployment on Binance Smart Chain.
- Presale launch with public marketing campaign.

Phase 2 (Q1 2026):

- End presale and unlock 15% of tokens.
- Launch CHUFR on major DEXs with initial liquidity pools.

Phase 3 (Q3 2026):

- Implement staking rewards for token holders.
- Integrate CHUFR as the exclusive payment method within the Chaufr app.

Phase 4 (2027 and Beyond):

- Expand partnerships with luxury services.
 - Launch treasury wallet governance for token holders.
-

10. Security and Auditing

- All smart contracts will be audited for vulnerabilities, including:
 - Reentrancy attacks.
 - Overflow/underflow risks.
 - Front-running issues.
 - Comprehensive testing will be performed on testnets before mainnet deployment.
-

11. Conclusion

CHUFR Token represents more than just a cryptocurrency; it is the backbone of the Chaufr ecosystem, combining luxury services with blockchain technology. With a well-defined tokenomics model, robust security measures, and a clear roadmap, CHUFR aims to redefine luxury ride-hailing and establish itself as a trusted and innovative token in the crypto space.
